Now extraterritorial, the High Sierras!
escapee from scene

If alien objects hear in country music “my”
 childhood as fig in a star people (home
 edition) collage
there *will* be
country music discovery
the collectors of the consoles of old values
soaking up vital vibes in majestic scenery;

country music bio rhythm #2 no words needed;
country music impact overvalued
by contemporary markets, specifically its
transformation of a gentle touch, NOT the
sailor's hornpipe blows the man down;
country music *the dignity of man*
variation at rocket rhythm #5 &
some "guy" from the brain bank speed reads
a lunar concerto country music. But

alien objects won't hear country music so
WHAT cultures pep and fun (and focus) in a

tarctic scene? Universal charisma,-
a violent nature's girl friday should've been ebb

Proud nation of frontrunners for impact, lost
just disco

In this scenario pleasant memories become
honky tonk humor about rapid transit for
luster to the High Sierras, "image-maker
sun belt" stuck fast in empire but free at last,
winning big.

Thought after cheap multiplex hypnosis
